

COMPANY POLICY

POL 3.1 ENVIRONMENTAL

Date : 13th April 2021 Author : Aaron Lusch Revision 9

Since the inception of Platypus Print Packaging, the company has always maintained an environmental focus. Our namesake, 'the platypus' is a uniquely Australian, egg laying mammal that has come under threat due to human urbanisation. Pollution, algal growths and the destruction of river banks are putting the lives of the Platypus at risk. The long term success of the Platypus relies on each of us being aware of our impact on the environment and then choosing to live more sustainably. Likewise, Platypus Print Packaging recognizes that being environmentally focused and engaging in sustainable practices is fundamental to business success.

Our environmental commitment is actioned as follows.

- Implementing initiatives to reduce waste, water and energy.
- Investment in energy reduction and renewable energy.
- Setting targets to reduce resource consumption.
- Promoting paper and board products that are sourced from sustainably managed forests.
- Reduce pollution through the reuse, recovery and recycling of materials.
- Showing external parties, the life cycle or stages products go through and how design, storage, use and end-of-life aspects are considered.
- Compliance with all environmental laws and regulations.
- Assisting our customers to meet the sustainable packaging guidelines.
- Assisting external and internal parties to reach their environmental objectives.
- Fulfilling our obligations as members of the Australian Packaging Covenant.
- Communicating the business's sustainability goals with all external and internal parties.
- Regularly reviewing our environmental objectives and targets.
- Maintaining certification to environmental standard ISO 14001.
- Supporting local conservation initiatives for the Australian platypus.

Platypus Print Packaging is committed to sharing our vision for sustainability and responsible environmental practices with all stakeholders.
